Dataset Overview

The project uses two CSV files provided as part of the X-Bank sample dataset: dim_customers and fact_spends.

Together, these datasets contain customer demographic and income information, along with their spending records across different months, spending categories and payment methods.

1. Customer Dimension — dim_customers

This dataset contains customer-level demographic and income information.

Column	Description
customer_id	Unique ID assigned to each customer.
gender	Gender of the customer (Male, Female).
age_group	Customer's age group (21–24, 25–34, 35–45, 45+).
marital_status	Marital status of the customer (Single, Married).
city	City of residence (Mumbai, Delhi-NCR, Chennai, Hyderabad, Bengaluru).
occupation	Occupation of the customer (Salaried IT Employees, Salaried Other Employees, Business Owners, Freelancers, Government Employees).
average_income	Average monthly income of the customer, in INR.

2. Spending Fact — fact_spends

This dataset contains customer spending records across different months, categories and payment methods.

Column	Description
customer_id	Unique customer ID linking to the dim_customers table.
month	Month in which spending was recorded (May, June, July, August, September, October).
category	Category of spending (e.g., Entertainment, Apparel, Electronics).
payment_type	Payment method used (Debit Card, Credit Card, UPI, Net Banking).
spends	Total amount spent by the customer for the specified month, category and payment type.

3. Dataset Relationship

The two datasets are connected through the customer_id column.

- dim_customers contains customer-level information.

- fact_spends contains the corresponding spending records.
- The relationship between the tables is one-to-many, with customer_id serving as the linking column.

4. Dataset Scope

Attribute	**Details**
Source files	2 CSV files
Customer dimension	dim_customers
Spending fact	fact_spends
Customer identifier	customer_id
Geographic coverage	5 cities
Age groups	4
Occupation categories	5
Payment methods	4
Spending period	May–October
